

TURF RESTORE

COMPOST & SEED

With a proprietary blend of compost and patented grass seed, Turf Restore ensures quick and successful seeding every time. Turf Restore is perfect for a wide range of professional applications including overseeding, spot repairs in high traffic areas, and long term maintenance programs aimed at improving and thickening lawns, greens, playing fields, and turf grass.

Good For Your Business: With application coverage of 10 Pounds per 1,000 Square Feet, and discounted pricing up to the truck load, Turf Restore is an economical solution for private and public sector greens professionals.

Quality Compost: Turf Restore's granulated compost, with soil amendments, is dust and odor free and spreads easily. It stimulates microbial activity and boosts soil health. The compost provides a natural bed for seeds while delivering much needed nutrients to young, establishing plants.

Patented Spreading Seed: Turf Restore's patented Perennial Rye Grass Seed improves seeding results and density, and germinates in as few as 4 days. It is guaranteed to be 100% free of weed seeds.

Nothing You Don't Want: Turf Restore is made of 80% compost, derived from leaf litter, and 20% grass seed. There are no bio-solids, manure or harsh chemicals so there are no unpleasant smells to worry about.

People & Pet Friendly: With no re-entry restrictions after application, Turf Restore is ideal public spaces like parks, playing fields, golf courses, municipal grounds, highways, and other corporate green spaces.

Personal & Professional: Our Pro Products Team is here to provide personal, professional service to your team, school, organization, government, or business. Call 844-GROWPOP
